

# Survey & Construction Staking Department

## Department Profile

Survey Coordinator: Terry A. Gregory

Our Survey Department utilizes state-of-the-art Topcon Total Stations with TDS Data Collectors and software. We have experienced crews ready to assist clients with boundary, topographic surveys, and construction layout and staking needs.

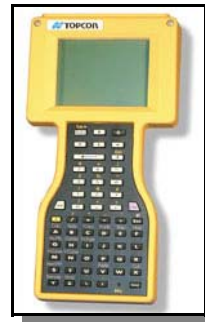

Research and property information gathered by our field crews will ensure that preliminary design takes into account setback and easement acquisition issues prior to final design.

### Project Profile: Arthur Eddy Academy (K-8) Renovations

William A. Kibbe & Associates, Inc. was selected to provide complete survey, geotechnical and civil engineering services for the 15 acre site, which included complete renovation of the existing Arthur Eddy School in Saginaw, Michigan.

The client, Saginaw Public School District, provides quality education for area students.

By working closely with the Architect (TSSF Architects), Owner and Construction Manager (RC Hendrick & Son), the project was completed on time and within the project budget. The project was completed by using the design / build delivery system.

## Services

- Topographic Surveys
- Boundary Surveys
- Construction Staking
- Elevation Certificates
- Wetlands—locating and mapping
