

Wilder Road Watermain Replacement

William A. Kibbe & Associates, Inc. provided complete design and construction engineering services for this replacement of an existing 6" dia. cast iron water main with a 12" dia. PVC water main in Bangor Township, Michigan.

The project included connections to the existing water distribution system at three (3) locations, a bi-directional bore of Wilder Road (5 lanes), and reconnection of existing customers.

By working closely with the owner and contractor, the project was completed on time and within the project budget. This project was completed using the design / bid / build delivery system.
