

Dixie Cut Stone & Marble

Project Profile

Dixie Cut Stone & Marble Plant 3 Renovations Bridgeport, Michigan

Architect/Engineer: William A. Kibbe & Associates, Inc.

Contractor: Various

Project Type: Manufacturing

Project Information

Building Size: 212,000 SF

Completion Date: Ongoing

Est. Construction Cost \$ 2-3 Million

Dixie Cut Stone & Marble of Bridgeport, a leading provider of marble, granite and limestone products, was outgrowing their current facilities and required additional space for many of their departments. William A. Kibbe & Associates was selected to provide design services ranging from code review and building analysis to architectural, structural, mechanical and electrical design.

Since Spring of 2000, WAK has assisted the owner in many aspects of this renovation including; office design, roof replacement, mechanical and electrical system analysis and design, and building life safety issues. The exterior façade renovation will be the next phase to unite the entire facility and entrances. Design considerations were given to continuous owner occupancy throughout much of the renovation to keep the facility under operation while maintaining proper egress and life safety issues.
